

FW 25 RECURVE & BARE BOW RISER

- Bow handle made of laminated resin beech plywood, CNC milling for maximum precision.
- ILF Limbs compatible.
- Hole for pressure button standard 5/16" and second hole for fixing the bare bow rest.
- Possibility to use without rest for INSTINCTIVE bow shot.
- FLOATING limbs pockets with brass alignment plates.
- Upper pocket in aluminum and lower pocket in brass for better balancing even without further addition of weights (however recommended for BARE BOW).
- Stainless steel limbs bolt assembled in AL 7075 black anodized bodies
- Integrated shock adsorbers (bare bow).
- Shock adsorbers replacement kit with adjustment locking system for INSTINCTIVE SHOOTING RULES (nut + washer + spacer in modifiable carbon fiber).
- Replaceable plastic grip (3D PLA).
- Total riser weight: ~1250 g. (without additional weights)
- 2 pairs of round brass weights. (Each pair brass weight with screw amount to 170 g.).
- Additional possibility (optional on request) of adding weight "FWW" made of brass / aluminum ~450 g. or completely in brass "FWBW" ~750 g.
- Front center stabilizer bushing 5/16"
- Finishing choice: natural or dark Walnut.
- Riser protection sleeve.
